rufus 2.9 build 934 - for non-Russians and those who do not understand English Posted by rufus Â»
11/11/2009 03:58 PM Installed here is such a miracle distribution kit. Everything works except the keyboard.
And I can't install Cyrillic either. Well, no way. And the Russian keyboard does not work, in the sense it does
not appear in the context menu. Who can help. P.S. Here is a distribution:
